Frontend Developer with **4.6+ years of experience** specializing in React.js and modern JavaScript. Currently working at **Accenture** as an Application Development Analyst, contributing to enterprise-grade AI applications. Experienced in building secure, scalable UIs with **AWS Cognito authentication**, RESTful API integration, and performance optimization. Hands-on with Shopify theme development, Astro SSR, and security practices including **XSS mitigation and SAST remediation**. Collaborative team player who delivers clean, maintainable code across cross-functional projects.

Technical Skills

Languages:	JavaScript (ES6+), HTML5, CSS3
Frontend:	React.js, Redux, Context API, React Router, Axios, Hooks, JSX
Styling:	Tailwind CSS, Bootstrap, Material UI, Ant Design
Performance:	Code Splitting, Lazy Loading, Debouncing / Throttling, Avoid Unnecessary Re-renders, Image Optimization, API Optimization
Backend & APIs:	Node.js, Express.js, RESTful APIs, Async/Await, JWT Authentication
Cloud & Auth:	AWS Cognito, SSO Integration, OAuth 2.0, Secure Cookie Management
DevOps:	Azure DevOps (Pipelines, PRs), Git
E-Commerce:	Shopify Development, Liquid, Theme Customization, Metafields, Metaobjects
Databases:	MongoDB, MySQL
Tools & Testing:	Postman, VS Code, NPM, Chrome DevTools, React Developer Tools, SonarQube, SAST, WebPT (API & Security Testing), Development (GitHub Copilot, Claude Code)

Experience

Accenture Application Development Analyst	June 2024 – Present
- Working across multiple enterprise applications: Bedrock (Shopify), AEH Federal, eGrants, and currently GenWizard Marketplace (Feb 2026 – Present). - On GenWizard Marketplace (Astro, React, TypeScript, JavaScript): architected secure cookie-based token storage replacing localStorage, mitigating XSS vulnerabilities; integrated AWS Cognito with SSR-safe initialization and automated migration. - Built real-time AI Chatbot module end-to-end — UI, API integration, conversation history, and delete functionality; implemented session timeout with auto-logout modal and idle detection. - Developed rating & feedback system, dynamic filter panel for agent discovery, prompt management pages with 403/404 error handling, and admin CRUD operations. - Resolved CSP and SAST vulnerabilities across projects; managed deployments and PRs via Azure DevOps pipelines. - Developed and customized Shopify themes (Bedrock project) using Liquid; implemented metafields and metaobjects for dynamic content handling.	
Dotsquares Technologies Software Developer <i>Web-Based Joint Lending Group (JLG)</i>	Dec 2022 – Oct 2023
- Developed user-facing features for a loan management platform supporting loan submissions, Role-Based Access Control (RBAC), and Master Data Management. - Integrated front-end with back-end APIs; handled asynchronous operations using async/await for a smooth, error-resilient experience. - Collaborated with cross-functional teams to deliver features on time; resolved bugs efficiently with well-documented solutions.	
BR Softech React.js Developer <i>IIT Allahabad Academic Portal</i>	Dec 2021 – Dec 2022
- Designed and developed new features for modules: online admissions, library services, examinations, and result management. - Built reusable, modular React components; integrated backend APIs via RESTful endpoints for asynchronous data operations.	

- Maintained clean, well-documented codebase; identified and resolved bugs to ensure application reliability.

MoreYeahs

July 2021 – Dec 2021

Jr. React.js Developer | *Dynamic E-Commerce Platform*

- Developed and maintained UI features for a dynamic e-commerce platform using React.js, JSX, and CSS.
- Implemented user interface components based on design specifications; enhanced shopping experience through responsive, performant UI.
- Debugged issues using Chrome DevTools; collaborated with designers and backend developers to meet project requirements.

CampusShala (CSEP)

Dec 2020 – May 2021

Frontend Development Intern

- Built foundational skills in HTML, CSS, JavaScript, React.js, and Node.js through hands-on training and real-world project tasks.

Key Projects

GenWizard Marketplace | Astro, React, TypeScript, JavaScript, AWS Cognito, Azure DevOps

An AI-powered marketplace platform where users can discover, interact with, and manage AI agents and prompts. Features include secure authentication, real-time chatbot, dynamic agent filters, rating & feedback system, and session management.

Web-Based Joint Lending Group (JLG) | React.js, Redux, REST APIs, Node.js

Loan management platform with RBAC, Master Data Management, and role-based user workflows. Integrated RESTful APIs for real-time data operations and optimized async data flows.

Shopify Bedrock Theme | Shopify, Liquid, Metafields, Metaobjects

Built custom Shopify storefront themes with dynamic content using metafields and metaobjects. Ensured responsive design and cross-browser compatibility.

IIIT Allahabad Academic Portal | React.js, REST APIs, Node.js

Comprehensive portal managing admissions, library, examinations, and results. Delivered modular React components with clean API integration across multiple service modules.

Dynamic E-Commerce Application | React.js, Context API, CSS3, Bootstrap

Feature-rich online shopping platform with product listings, cart management, and user authentication. Focused on responsive design and smooth state management.

Certifications & Training

Agentic AI Training	Accenture, 2026
GitHub Copilot Training	Accenture, 2025

Education

Master of Computer Applications (MCA) RGPV University, Bhopal	2019 – 2021
Bachelor of Computer Applications (BCA) Jiwaji University, Gwalior	2016 – 2019
